

Trading Armex

Important Features

Platform:

MetaTrader4

Timeframes:

M15, M30, H1 and H4

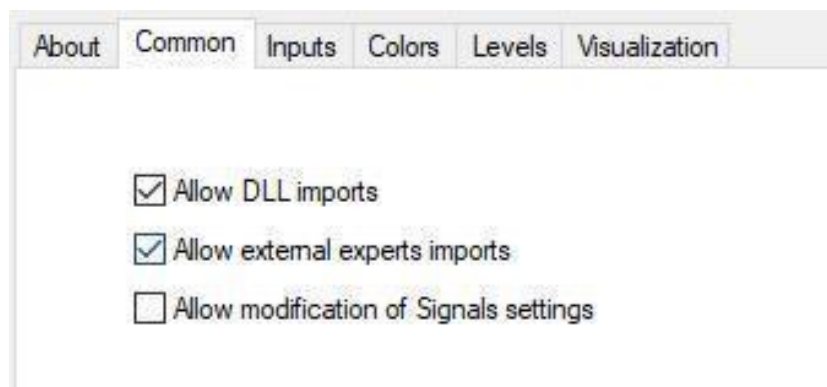

Currency Pairs:

All currency pairs

Installation

1. Unzip the file you've downloaded.
2. It contains a single file: **TradingArmex.ex4**
3. Open your MT4.
4. Go to "File – Open Data Folder – MQL4".
5. Copy ".ex4" from the folder you've downloaded and paste it into the "Indicators" folder in MQL4.
6. Restart the MT4.

In order to attach the indicator, drag and drop it to the chart of your choice. Then enable two options as shown below and click OK.

PLEASE MAKE SURE THAT YOU'VE REGISTERED YOUR MT4 NUMBERS, OTHERWISE THE SOFTWARE WILL NOT WORK! Contact us at support@altraforex.com if you require assistance with license activation.

Entering and Exiting the Trade

After the Buy/Sell levels are generated, you should wait for the price to reach either Buy Entry level or Sell Entry level and enter the trade accordingly.

As soon as the price reaches one of the entry levels, you will get signal alert with all the information about the trade. Don't forget to use recommended StopLoss value.

We recommend aiming at exiting the trade at the first TakeProfit level. If the TakeProfit level is not reached in the trade, exit the trade when the opposite signal is generated.

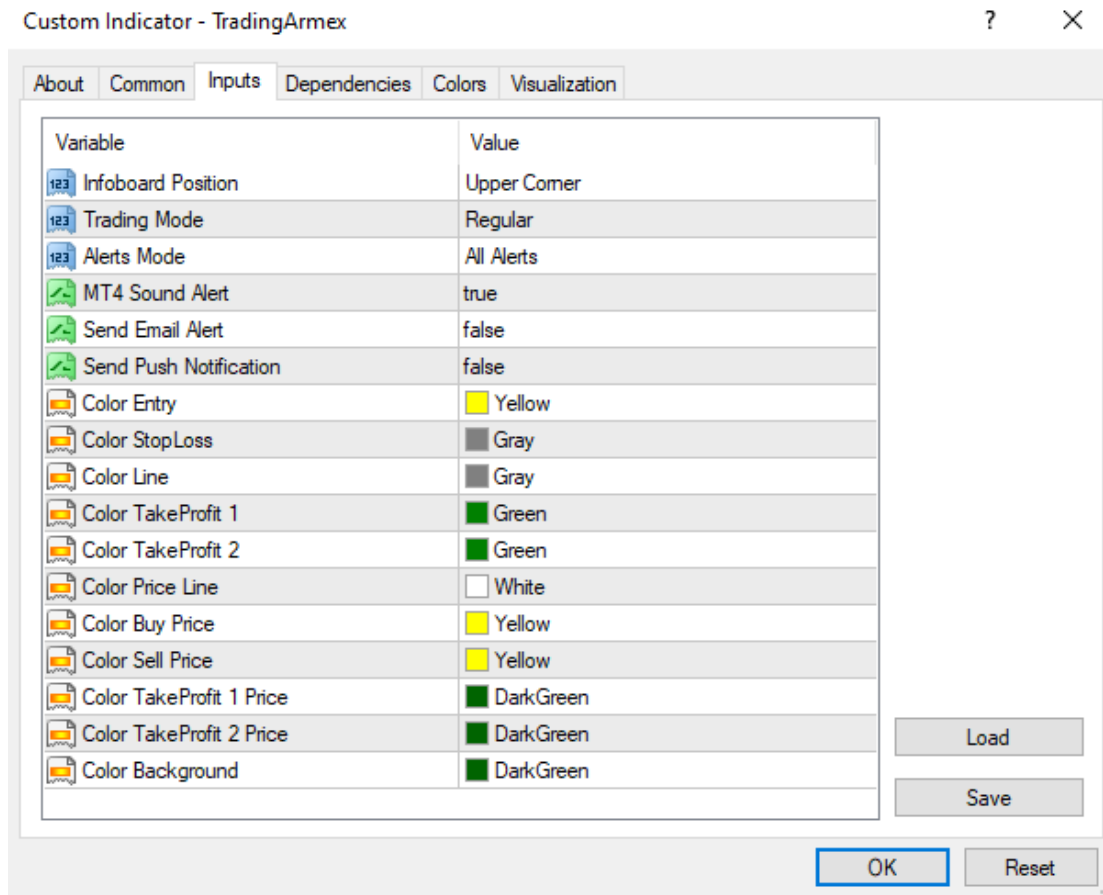

Recommended Pairs

In order to see the best performance possible from Trading Armex, we recommend using the following pairs :

- EURUSD
- GBPUSD
- USDJPY
- GBPJPY
- NZDCHF
- NZDUSD
- GBPCHF

Those pairs work on all timeframes, but we recommend taking look at M30 and H1 timeframes first.

Inputs

Infoboard Position is responsible for the placement of infoboard.

Trading Mode is responsible for the choice between Regular and Extensive Modes. Extensive mode has bigger TakeProfit values.

Alerts Mode is responsible for the display of alerts in your MT4. You can either get all the alerts or only when Buy/Sell Entry level is reached.

MT4 Sound Alert is responsible for displaying pop-up alert.

Send Email Alert is responsible for sending the email to your inbox as soon as the signal is generated.

Send Push Notification is responsible for sending push notification to your phone as soon as the signal is generated.

Color fields are responsible for the colors of the indicator displayed on the chart.

Setting Push Notifications

1. Download MetaTrader 4 application from AppStore or Google Play to your phone.
2. Go to “Settings – New Account – Login to an existing account”.
3. Choose your broker and sign in using your login and password from PC version of MT4.
4. Go to “Settings – Chat and Messages”. At the bottom of the screen you will find your MetaQuotes ID.
5. Open MT4 on your PC. Go to “Tools – Options – Notifications” and enter your ID from your phone to MetaQuotes ID field.
6. Don't forget to click on “Send Notification” in the Indicator inputs and choose “true” every time you attach the indicator to a chart.

Setting Email Notifications

1. Open MT4 on your PC. Go to “Tools – Options – Email” and click “Enable”.
2. Enter your SMTP server (you can use search engine to learn which one is correct for your email provider).
3. Enter your email address in the fields “SMTP login”, “From” and “To”
4. Enter your email password in the “SMTP password” field.
5. Don't forget to click on “Send Mail” in the Indicator inputs and choose “true” every time you attach the indicator to a chart.
