

Forex Lumina

ForexLumina.com

Important Features

Platform:

MetaTrader5

Timeframes:

M15, M30, H1

Currency Pairs:

All currency pairs

Metals

Indices

Crypto

Installation

1. Unzip the file you've downloaded.
2. It contains a single file: **Forex_Lumina_Indicator.ex5**
3. Open your MT5.
4. Go to "File – Open Data Folder – MQL5".
5. Copy "Forex_Lumina_Indicator.ex5" from the folder you've downloaded and paste it into the "Indicators" folder in MQL5.
6. Restart the MT5.

In order to attach the indicator, drag and drop it to the chart of your choice. Then enable option "Allow DLL imports" as shown below and click OK.

PLEASE MAKE SURE THAT YOU'VE REGISTERED YOUR MT5 NUMBERS, OTHERWISE THE SOFTWARE WILL NOT WORK! Contact us at support@altraforex.com if you require assistance with license activation.

Interface

This is how your chart should look like after the installation:

Please note: if you feel that your MetaTrader is slowing down when you load the software on the chart, try disabling the color scheme of the chart in the Inputs (choose “*false*” for **Color scheme**).

Recommended Pairs

In order to see the best performance possible from Forex Lumina, we recommend using these pairs:

- EUR/USD
- GBP/USD
- AUD/USD
- GBP/AUD
- GBP/JPY
- USD/JPY
- EUR/AUD
- EUR/JPY

Entering and Exiting the Trade

Once your indicator is installed, you need to wait for a new signal to be generated. It may take some time – the higher the timeframe, the longer the possible wait may be. Please make sure to enter the trade only when the new signal generated.

As soon as the NEW signal is generated, you will get signal alert with all the information about the trade. Don't forget to use recommended StopLoss value.

This is how new Buy and Sell signals look on the chart.

We recommend aiming at exiting the trade at the Opposite signal. If you choose to exit at the TakeProfit level and the chosenTakeProfit level is not reached in the trade, exit the trade when the opposite signal is generated.

Inputs

The screenshot shows the 'Forex_Lumina_Indicator 1.00 (AUDCAD,M15)' settings window with the 'Inputs' tab selected. The window contains a table of variables and their values, along with 'Load', 'Save', 'OK', and 'Reset' buttons.

Variable	Value
< Forex Lumina Settings >	
Trading Style	Moderate
< TP and SL Settings >	
TakeProfit M15	300
StopLoss M15	150
TakeProfit M30	400
StopLoss M30	200
TakeProfit H1	800
StopLoss H1	400
< Alerts Settings >	
MT4 Sound Alert	true
Send Email Alert	false
Send Push Notification	false
< Other Settings >	
Show Infoboard	true
Minimize Infoboard	false
Color Scheme	true
BUY Signal Color	Yellow
SELL Signal Color	DarkOrange
Font Size	10

< Forex Lumina Settings >

Trading Style allows you to change the intensity and frequency of the signals generated. There are three options: Aggressive (the highest frequency of the signals), Medium and Moderate (the lowest frequency of the signals).

< TP and SL Settings >

TakeProfit M15 allows you to manually configure TakeProfit value on M15 timeframe. Set to 30 pips by default. (Shown in points as 300).

StopLoss M15 allows you to manually configure Stop Loss value on M15 timeframe. Set to 15 pips by default. (Shown in points as 150).

TakeProfit M30 allows you to manually configure TakeProfit value on M30 timeframe. Set to 40 pips by default. (Shown in points as 400).

StopLoss M30 allows you to manually configure Stop Loss value on M30 timeframe. Set to 20 pips by default. (Shown in points as 200).

TakeProfit H1 allows you to manually configure TakeProfit value on H1 timeframe. Set to 80 pips by default. (Shown in points as 800).

StopLoss H1 allows you to manually configure Stop Loss value on H1 timeframe. Set to 40 pips by default. (Shown in points as 400).

< Alerts Settings >

MT4 Sound Alert is responsible for displaying pop-up alert.

Send Email Alert is responsible for sending the email to your inbox as soon as the signal is generated.

Send Push Notification is responsible for sending push notification to your phone as soon as the signal is generated.

< Other Settings >

Show Infoboard is responsible for displaying the Infoboard on the chart.

Minimize Infoboard is responsible for showing only the heading of the Infoboard.

Color scheme is responsible for showing the background of the chart and the candle bars in specific Forex Lumina colors. In order to return to default MT4 colors, switch this field to "false"

BUY Signal Color and **SELL Signal Color** are responsible for the colors of the interface elements on the chart.

Font Size is responsible for depicting the font in the Infoboard. If your Infoboard is illegible, please try either changing the screen resolution of your PC or decreasing Font Size value.

If your Forex Lumina is not working...

If you think that your software is not functioning properly, there are several possible reasons for that.

1. Please make sure you've unpacked the zip archive with the installation package and installed it into the right folder (**Forex_Lumina_Indicator.ex5** goes into the “**Indicators**” folder, not the “**Experts**” folder).

2. If you are getting the message “DLL import is disabled” like this:

Then please follow the instructions from the alert, go Tools - Options - Expert Advisors and allow DLL there:

3. If your chart is blank, it is possible that there has been some issue with the activation. Please contact us at support@altraforex.com or via a Telegram [@olivermurphy](https://t.me/olivermurphy) and we will do our best to try and help you as soon as possible.

Setting Push Notifications

1. Download MetaTrader 5 application from AppStore or Google Play to your phone.
2. Go to “Settings – New Account – Login to an existing account”.
3. Choose your broker and sign in using your login and password from PC version of MT5.
4. Go to “Settings – Chat and Messages”. At the bottom of the screen you will find your MetaQuotes ID.
5. Open MT5 on your PC. Go to “Tools – Options – Notifications” and enter your ID from your phone to MetaQuotes ID field.
6. Don’t forget to click on “Send Notification” in the Indicator inputs and choose “true” every time you attach the indicator to a chart.

Setting Email Notifications

1. Open MT5 on your PC. Go to “Tools – Options – Email” and click “Enable”.
2. Enter your SMTP server (you can use search engine to learn which one is correct for your email provider).
3. Enter your email address in the fields “SMTP login”, “From” and “To”
4. Enter your email password in the “SMTP password” field.
5. Don’t forget to click on “Send Mail” in the Indicator inputs and choose “true” every time you attach the indicator to a chart.
