Pressing “Exit at the Opposite Signal” or “Exit at the TakeProfit Level” opens the trade with all the necessary settings. Trade will be closed automatically when the opposite signal is generated or at the chosen Take Profit level. If the desired level is not reached then trade will close at StopLoss.

Please note that for Forex Polaris to run correctly your MT4 should stay opened!

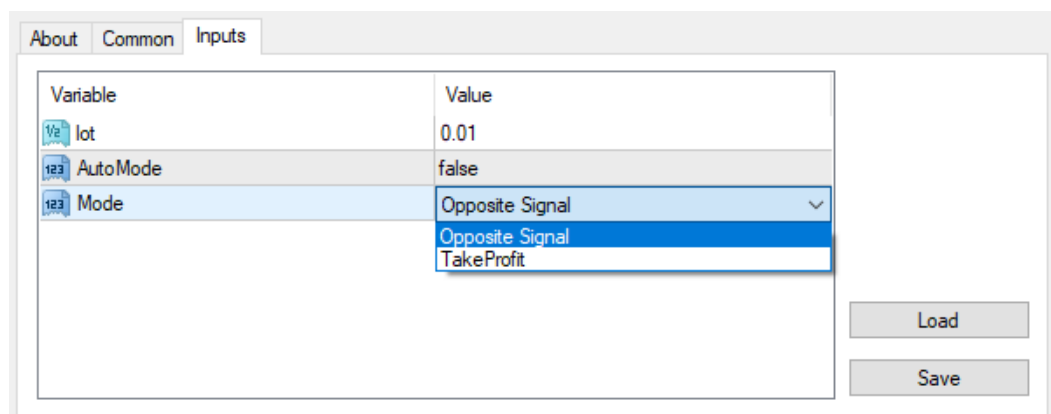

Important Rules

If you intend to use Forex Polaris Manager please make sure that you attach it to the chart at the same time with Forex Polaris indicator. If you attached Forex Polaris indicator to the chart and it generated the signal before you managed to attach Forex Polaris Manager to this chart, close the chart and open it again.

Do not use Forex Polaris and Forex Polaris Manager on the charts with the same currency pairs but different timeframes. You should have one chart for one currency pair at a time.

Please note that Forex Polaris Manager will exit the trade if the opposite signal is generated before StopLoss or chosen TakeProfit level are reached.

Inputs and AutoMode

Forex Polaris Manager can be turned into a fully automatic EA by enabling AutoMode in the Inputs of the software. There you can also choose lot size and whether EA will exit the trade at the opposite signal or at the TakeProfit level..
