

Forex Polaris

Important Features

Platform:

MetaTrader4

Timeframes:

M15, M30, H1, H4

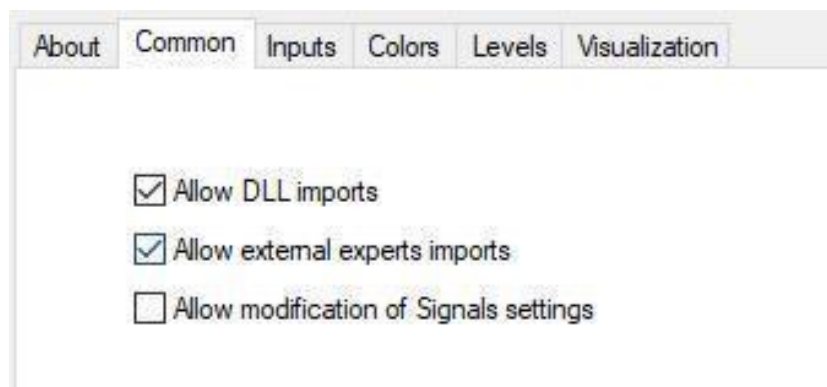

Currency Pairs:

All currency pairs

Installation

1. Unzip the file you've downloaded.
2. It contains a single file: **ForexPoraris.ex4**
3. Open your MT4.
4. Go to "File – Open Data Folder – MQL4".
5. Copy ".ex4" from the folder you've downloaded and paste it into the "Indicators" folder in MQL4.
6. Restart the MT4.

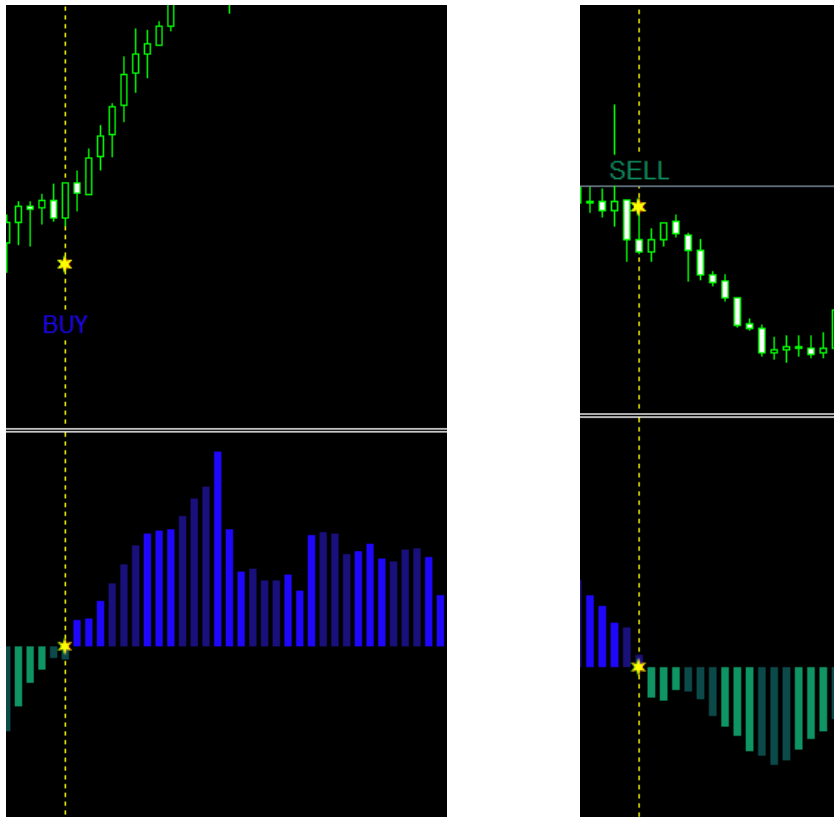

In order to attach the indicator, drag and drop it to the chart of your choice. Then enable two options as shown below and click OK.

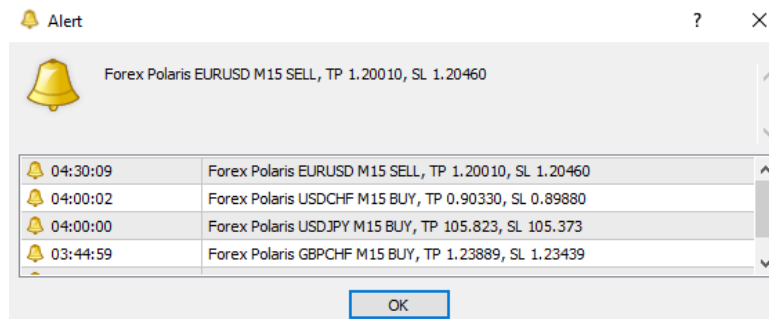

PLEASE MAKE SURE THAT YOU'VE REGISTERED YOUR MT4 NUMBERS, OTHERWISE THE SOFTWARE WILL NOT WORK! Contact us at support@altraforex.com if you require assistance with license activation.

Entering and Exiting the Trade

Enter the trade as soon as Buy or Sell signal is generated.

As soon as the signal is generated, you will get signal alert with all the information about the trade. Don't forget to use recommended StopLoss value.

We recommend aiming at exiting the trade at the TakeProfit level. If the TakeProfit level is not reached in the trade, exit the trade when the opposite signal is generated.
