Initial Lot Size is the initial lot size used by the robot when trading commences. It can and will increase lot sizes at times.

Order Comment allows you to manually configure the comment generated by the software at the time of the order opening.

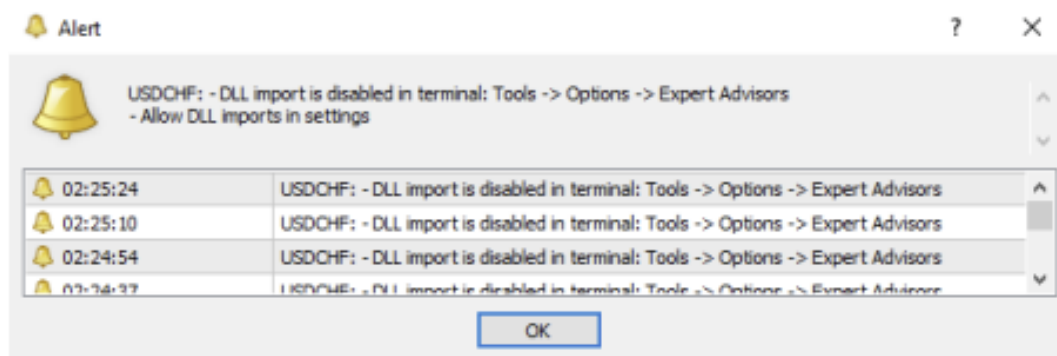

Magic number is responsible for displaying the magic number of the software.

Font Size is responsible for depicting the font in the Manager window. If the text in the window is illegible, please try either changing the screen resolution of your PC or decreasing Font Size value.

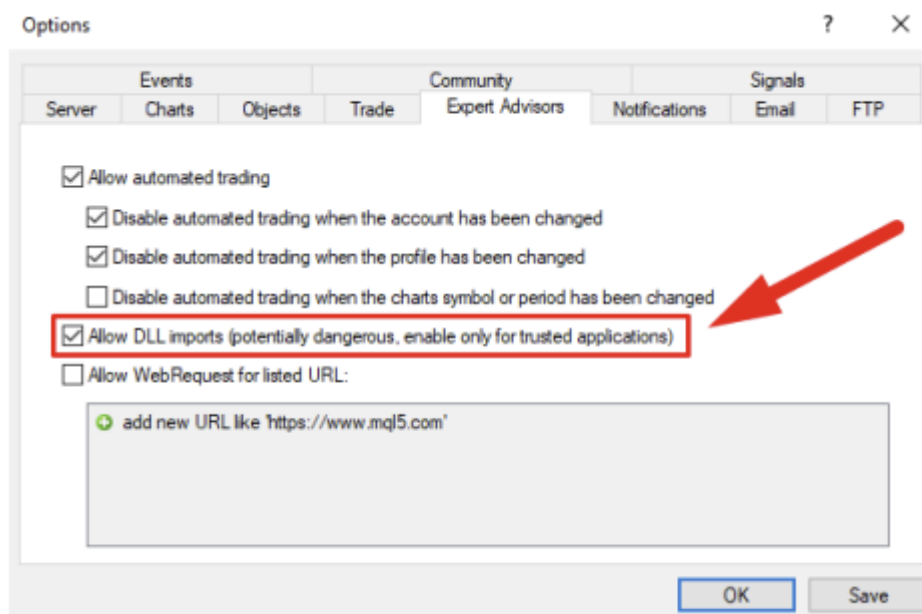

If your Forex Enigma Bot is not working...

If you think that your software is not functioning properly, there are several possible reasons for that.

1. Please make sure you've unpacked the zip archive with the installation package and installed it into the right folder (**Forex_Enigma_Bot.ex4** goes into the **"Experts"** folder, not the "Indicators" folder).
2. If you are getting the message "DLL import is disabled" like this:

Then please follow the instructions from the alert, go Tools - Options - Expert Advisors and allow DLL there:

3. If your chart is blank, it is possible that there has been some issue with the activation. Please contact us at support@altraforex.com or via a Telegram [@olivermurphy](https://www.telegram.com) and we will do our best to try and help you as soon as possible.
4. Even if you have the smiley face in the right upper corner but still feel that your Forex Enigma Bot is malfunctioning, please open the “Experts” tab in the Terminal. If it says “Activation expired” there, please contact our team.
5. If you have any other concerns regarding your software, please don’t hesitate to contact us at support@altraforex.com or via a Telegram [@olivermurphy](https://www.telegram.com) and we will do our best to try and help you as soon as possible.
